PROFESSIONAL SUMMARY

A 4th year Computer Science student at Biliran Province State University with a passion for application design. I have experience in designing layouts, and I'm always looking for ways to learn and create better digital experiences.

EDUCATION

Bachelor of Science in Computer Science
Biliran Province State University | School of Technology and Computer Studies

PROJECTS

- **HERBMED** | **Herbal Medicine Web Application** | Solo Project | 2025

Tools: HTML | CSS | Python | JavaScript | Github | phpMyAdmin | Django

- Designed and developed a herbal medicine web application that combines tradition and science, helping people around Biliran Province explore the healing power of herbs and discover natural remedies.

- **Voting System** | **E-Voting Desktop Application** | Solo Project | 2024

Tools: Visual Basic.Net | phpMyAdmin

- Designed the user interface of an e-voting desktop application, from the log-in screen to the e-ballot, giving voters a new and easier way to cast their votes.

- **BiPSU SRMS** | **Scholarship Management System** | Thesis Project | 2026

Tools: CSS | Python | Supabase | Github | Tailwind CSS

- Designed a scholarship portal for Biliran Province State University where students can explore internal and external scholarship programs and check if they are eligible.

TECHNICAL SKILLS

Programming Language: Python

Frameworks: HTML | CSS | Django | phpMyAdmin

Tool: Github
